

## **EXHIBITOR DETAILS, ASPA CONFERENCE AND TRADE AIR, NADI, FIJI, 22 AND 23 MAY 2008**

**ATCANZ** has 14 years experience in supplying aviation safety management, training, business development and support services in the airline, airports and air navigation services sectors in the Asia Pacific region. It has specific expertise in Air Traffic Management (ATM) that covers all areas of air traffic services operations, including airspace management and air navigation charges. ATCANZ also offers consultancy and project management services to clients who operate in the aviation industry, in particular airport companies in the Asia Pacific region.

The company has a number of strategic alliances in the international market and can draw on these alliances to provide a complete service. ATCANZ has a training campus on Christchurch International Airport where it focuses on delivering airline and airport staff in service and personal development training.

### **AVIATION TOURISM AND TRAVEL TRAINING ORGANISATION (ATTTO)**

The ATTTO sets the standards for qualifications in Aviation, Tourism, Travel and Museums. It was established in 1994 with the Museum sector being added to the portfolio in early 2005. ATTTO provides a range of services and functions to support the development and application of skills and qualification standards across the industries it is responsible for.

The role of Industry Training is to promote and enable the uptake of training programmes in the workplace that culminate in the award of National Certificates and National Diplomas. This includes providing mentoring and support via Industry Training Advisors, benchmarking and aligning in-house training programs, registering trainees and training assessors, arranging training seminars and assessments, etc.

**Sue Masson**, Regional Manager Northern, and Stuart Horner, Qualification Manager, ATTTO, Level 5, Tourism and Travel House, Wellington  
Tel +64 4 499 6580, fax +64 4 499 6577

**AVIATION TRAVEL AND TRAINING GROUP** was established over 20 years ago. It is the only non-airline company accredited by NZCAA and NZQA to provide flight attendant training and has, for example it has its own Boeing 747 cabin trainer for flight attendant training. Specialist services provided for customers include:

- Fully trained flight attendants ready to fly
- Leasing our Aircrew training centre in Auckland
- Outsourcing your initial flight attendant training
- Initial on-line training for flight attendants including a pre-selection program so that only the highest calibre trainees are selected

**CTC AVIATION NEW ZEALAND** is a division of CTC Aviation Group, one of the world's leading providers of airline pilot training. The New Zealand centre was opened in 2005, since when more than 200 pilots and flying instructors have been trained. The New Zealand operation is expanding to supply 200 pilots per year. CTC specialises in developing customized airline pilot training programmes to meet the needs of its worldwide airline partners.

CTC Aviation is New Zealand's only provider of a NZCAA approved Part 141 integrated commercial pilot course. The company also has approval to train cadets on the JAA integrated CPL course with permission to conduct JAA CPL flight tests in New Zealand.

**John Jones**, Chief Executive, CTC Aviation NZ, 131 Boyd Rd, RD2, Hamilton 3281  
Tel +64 7 843 1837, fax +64 7 843 3776  
Email john.jones@ctcaviation.com

**FIELDAIR ENGINEERING** was established in 1951 and today ranks amongst New Zealand's most capable aircraft maintenance companies providing Air Transport and General Aviation operators with access to a wide range of airframe, engine, instrument, electrical and manufacturing services. With a stable and experienced workforce and excellent facilities the company is proud of its reputation for safety and service. Aircraft engineering is its business.

Fieldair Engineering is envied industry wide for its "down to Earth" reputation as a leading provider of quality aircraft maintenance services. Already supplying component repair and overhaul services for most of the operators throughout the Pacific region, it recognises the special requirements of the Island operators. Between its facilities at Palmerston North, Auckland and Christchurch airports, the company is fully equipped to cater for both the small GA and large airline operators throughout the Pacific.

**ISL SIGNAGE SYSTEMS** through its Flight Signs brand, promotes its experience in both graphic and product design, to provide signage solutions for firms in the aviation sector. This includes Airline and Airport Branding Signage (Buildings, Directional, Check-In Counters, PoS, Vehicles, Bill Boards), and a full suite of OSH, Security and Commercial Signage. Clients include airlines, airports, government departments operating in the aviation and infrastructure sectors and our work can be seen throughout New Zealand, Australia and the Pacific, even at the South Pole Station!

The company has 20 years experience supplying signage ranging from the smallest items of aircraft placarding through to major airline branding signs on hangars and everything in between. It supplies everything from decals and computer cut lettering to backlit illuminated and neon signs, but does so with a strategy aimed at solving any signage issues clients might have in as cost-effective a way as possible.

**Alan Peacock**, Director, ISL Signage Systems, PO Box 14-216, Christchurch International Airport, Christchurch 8544  
Tel +64 3 358 0470, no fax  
Email alan@flightsigns.co.nz

**TAKEFLITE SOLUTIONS** makes it economic for small airlines and tour operators to have top end computing services. All information, including online bookings, is stored in one safe place and can be accessed by all company staff from virtually anywhere. TakeFlite overcomes the need to build your own system in Access or Excel, or having a software company build a system from scratch. Companies looking to add an online booking module to existing systems should also look closely at TakeFlite.

The company was set up 5 years ago. It has high profile customers throughout New Zealand and has set up in Australia to service the growing number of customers in that market. One Australian company had spent A\$700,000 over four years trying to develop and implement a system before it discovered TakeFlite. Small Airlines & Tour Operators who need to manage

their businesses for more efficiency, growth, quality and profitability will benefit from TakeFlite.

**Jo Stafford**, TakeFlite Solutions, PO Box 116, Picton 7250
